Dear [redacted]

STAT

So sorry to hear you're down for parts and maintenance, and I hope that bronchial problem will be soon cleared up. I did the best I could with [redacted] and my groups, working off the notes I had from your presentation last Fall, but it wasn't the authoritative presentation you'd have given. But thanks anyway for being willing to come and I hope you'll be in great shape next Fall. Meanwhile, get well and don't push it too early. At our age we don't bounce back as we did 30 years ago.

STAT

Take care -

J.J. Hitchcock
